About Us

We're not just another Software Development Agency

Founded in 2019, by Ayush Agarwal, the company started with our vision to bring in a visible impact in the world, and make it a better place. Since 2019, we've worked with various startups, companies, and individuals who are trying to solve the problems in their own industries.

With our experience in technology, and their expertise of the industry, together we make something that's truly revolutionizing!
